Annex

4.1 List of references

1 *Technische Anleitung zur Reinhaltung der Luft (TA Luft)* ('Technical Guidelines for Keeping Air Clean') 2002, Gemeinsames Ministerialblatt, Jahrgang 2002, Nr 25–29, Seite 509–606.

2 *Modellen voor de berekening van de Verspreiding van Luchtverontreiniging, inclusief aanbevelingen voor de waarden van parameters in het Lange-Termijnmodel* ('Models for calculation of the spread of air pollution, including recommendations for the values of parameters in the long-term model'), Air Pollution Subcommittee, April 1976.

3 *Parameters in het Lange-Termijnmodel Verspreiding Luchtverontreiniging, Nieuwe aanbevelingen* ('Parameters in the long-term model for the spread of air pollution, New recommendations'), Working Committee on the Spread of Air Pollution, Delft, September 1984.

4 *Frequentieverdelingen van luchtverontreinigings-concentraties, een aanbeveling voor een rekenmethode* ('Frequency distributions of air pollution concentrations, Recommendation for a calculation method'), Working Committee on the Spread of Air Pollution, Delft, August 1981.

5 *Invloed van een gebouw op de verspreiding van schoorsteenpluimen, Aanbeveling voor een Rekenmethode* ('Effect of a building on the spread of stack plumes, Recommendation for a calculation method'), Working Committee on the Spread of Air Pollution, Delft, October 1986.

6 *Bestrijdingsstrategie voor de emissies van vluchtige organische stoffen* ('Abatement strategy for emissions of volatile organic compounds'), KWS 2000 Hydrocarbon Project, Ministry of Housing, Spatial Planning and the Environment, February 1989.

8 *KWS2000 en Vergunningen* ('KWS2000 Hydrocarbon Project and Permits'), KWS2000 Hydrocarbon Project, Ministry of Housing, Spatial Planning and the Environment, April 1990.

9 *Nationaal MilieubeleidsPlan* ('National Environmental Policy Plan'), Lower House of Parliament, parliamentary year 1988–89, 21 137 nos. 1–2, Ministry of Housing, Spatial Planning and the Environment
Nationaal MilieubeleidsPlan –plus ('National Environmental Policy Plan-plus'), Lower House of Parliament, parliamentary year 1989–90, 21 137, no. 20 Ministry of Housing, Spatial Planning and the Environment.

10 *Het nieuwe nationaal model, Model voor de verspreiding van luchtverontreiniging uit bronnen over korte afstanden* ('The new national model, Model for the spread of air pollution from sources over short distances'), TNO MEP, Apeldoorn, 1998.

11 *Nationaal Milieubeleidsplan 3* ('National Environmental Policy Plan 3'), Ministry of Housing, Spatial Planning and the Environment, 1997.

12 *De Wet Milieubeheer* ('The Environmental Protection Act'), Prof. Mr. Drs. F.C.M.A. Michiels, Tjeenk Willink, 1992.

13 *Stoffen en normen, overzicht van belangrijke stoffen en normen in het milieubeleid* ('Substances and standards, overview of major substances and standards in the environmental policy'), Ministry of Housing, Spatial Planning and the Environment, Samsom 1999.

14 *Document meten en rekenen geur* ('Document on measuring and calculating odours'), Publication series Air and Energy no. 115, Ministry of Housing, Spatial Planning and the Environment, December 1994.

15 *Beschrijving van luchtemissiebeperkende technieken* ('Description of air emission abatement techniques'), Tauw, InfoMil no. L26, March 2000.

16 *Samenwerkingsproject Procesbeschrijvingen Industrie Nederland (SPIN)* ('Cooperative Project for Process Description in Dutch Industry'), RIVM, 1992 – 1996.

17 *Die Neue TA Luft* ('The New TA Luft'), dr. Dieter Jost, Weka Verlag, Augsburg, February 2000.

18 *Circulaire Vergunning op hoofdzaken /vergunning op maat* ('Circular concerning framework permits / Customised permits'), 3 June 1999.

19 *Economische en technische realiseerbaarheid concept-emissie-eisen voor stof volgens de NeR* ('Economic and technical feasibility of draft emission standards for particulates according to the NeR'), Haskoning, 1992.

20 *Kosteneffectiviteit van milieumaatregelen in de industrie. Beschrijving van de methodiek, deel A* ('Cost effectiveness of environmental measures in industry. Description of the methodology, part A'), Ministry of Housing, Spatial Planning and the Environment, 1995, in Lucht & Energie, no. 119, December 1995.

21 *Kosteneffectiviteit van milieumaatregelen in de industrie. Vaststellen van het referentiekader, deel B* ('Cost effectiveness of environmental measures in industry. Adoption of the frame of reference, part B'), Ministry of Housing, Spatial Planning and the Environment, 1995, in Lucht & Energie, no. 120, December 1995.

22 *Vervolgonderzoek kosteneffectiviteit van milieumaatregelen in de industrie* ('Follow-up study, cost effectiveness in industry'), Ministry of Housing, Spatial Planning and the Environment, 1995, in Lucht & Energie, no. 126, November 1997.

23 *Evaluatie methode kosteneffectiviteit (KE)* ('Cost effectiveness evaluation method), no. L29. Informatiecentrum Milieuvergunningen, InfoMil, The Hague, January 2000.

24 *Prijzenboekje, kostengegevens ten behoeve van ramingen* ('Price book, costing data for estimates'), Dutch Association of Cost Engineers, DACE, Leidschendam, annual publication.

25 *Reductiepotentieel van NO_x emissie bij de industrie, raffinaderijen en centrales met de samenhangende kosten* ('Reduction potential of NO_x emissions in manufacturing, refineries and power stations with related costs'), Stork Engineering Consultancy, February 1998.

26 *Reductiepotentieel van NO_x emissies bij de industrie, raffinaderijen en centrales met de samenhangende kosten; Aanvullende studie* ('Reduction potential of NO_x emissions in manufacturing, refineries and power stations with related costs; Supplementary study'), Stork Engineering Consultancy, 28 October 1998.

27 Ministry of Housing, Spatial Planning and the Environment: *Strategienota omgaan met stoffen*, (Strategy on Management of Substances) Implementation Strategy on Management of Substances, 1st progress report, march 2002; 2nd progress report, october 2002.
