Preface

Index *9*

0 Introduction *13*
0.1 Purpose and target group *13*
0.2 Legal status and policy context *13*
0.3 Background of the NeR system *13*
0.4 How to read this document *13*
0.5 Structure of the NeR organisation and the authorisation process *14*

1 Application of the NeR: the NeR in 8 steps *15*
Step 1 When do you use the NeR? *17*
Step 2 Does another policy have precedence over the NeR? *17*
Step 3 Does a special regulation apply? *19*
Step 4 How do the general standards function? *19*
Step 5 Which concentration standard do you apply? *20*
Step 6 What about ALARA? *21*
Step 7 Which permit requirements? *21*
Step 8 What to include in the preamble? *22*

2 General conceptual framework *23*
2.1 Underlying idea of the NeR *25*
2.2 Relation to other environmental policy *27*
2.3 System *29*
2.4 Application of the system in different emission situations *32*
2.5 Translation of NeR standards into permit requirements *35*
2.6 Special regulations for specific processes *38*
2.7 Process-integrated facilities and integral consideration *38*
2.8 VOC emissions *42*
2.9 Odour *47*
2.10 Particulates and fine particulates *48*
2.11 Cost effectiveness of environmental measures *49*
2.12 Application of BAT reference documents *53*

3 Requirements and emission reductions *57*
3.1 Introduction *59*
3.2 General emission standards *61*
3.2.1 Extremely hazardous substances *61*
3.2.2 Emission standards for carcinogenic substances *64*
3.2.3 Emission standards for particulates *65*
3.2.4 Emission standards for inorganic substances *67*
3.3 Special regulations for specific processes *71*
A1 Manure processing plants *73*
A2 Fodder drying facilities *73*
A3 Livestock feed compounders *75*
B1 Sugar factories *77*
B2 Production of starch and starch derivatives *77*
B3 Large bakeries *77*
B4 Rusk and pastry bakeries *79*
B5 Meat industry *82*
B6 Cocoa bean processing industry *89*
B7 Coffee-roasting houses *91*
B8 Potato processing industry *92*
B9 Aromatics and flavourings manufacturers *93*
B10 Breweries *96*
C1 Woodworking; Production of wood fibre and particleboard; Sawmills *99*
C2 Coarse ceramics industry *99*
C3 Production of mineral fibre *99*
C4 Glass production *99*
C5 Asphalt mixing plants *100*
D1a Pig iron production; Iron ore sintering *101*
D1b Pig iron production; Iron ore palletising *101*
D1c Pig iron production; Blast furnaces *102*
D1d Production of oxygen blown steel *102*
D2 Production of primary aluminium *102*
D3 Iron and steel foundries and smelting plants *102*
E1 Coking plants *102*
E2 Production of chlorine *102*
E3 PVC-production; Suspension polymerisation *102*
E4 Production of acrylonitrile *103*
E5 Manufacture of plastics containing acrylonitrile *103*
E6 Claus plants (used in sulphur production and as a flue gas treatment system) *103*
E7 Production of nitrogen-based fertiliser *103*
E8 Ammonia plants *104*
E9 Installations for the production, formulation or packaging of pesticides *104*
E10 Production of silicon carbide *104*
E11 Installations for natural gas and petroleum extraction *104*
F1 Installations for the thermal reclamation of metals from cables and corresponding utilities *107*
F2 Heat-based cleaning of commodities including electric motors and equipment for processing synthetic polymers *108*
F3 Crematoriums *108*
F4 Pyrolysis plants *110*
F5 Installations for thermal soil cleanup *110*
F6 Installations for the incineration of communal sewage sludge from waste water treatment plants *111*
F7 Installations for the incineration of uncontaminated wood and wood parings *112*
G1 Processing of gas emissions from landfill sites, waste fermentation and anaerobic waste water treatment plants *113*
G2 Composting installations for vegetable waste *114*
G3 Sewage treatment installations *117*
G4 Compost production from household organic waste *122*
Z1 Surface treatment of metals with nitric acid *124*
Z2 Production of carbon anodes *124*
Z3 Leather industry *124*

3.4 VOC-measures *127*
3.4.1 Measures to limit VOC emissions *127*
3.4.2 Mineral oil chain: general *127*
3.4.3 Mineral oil chain: refineries and crude oil terminals *128*
3.4.4 Mineral oil chain: petrol distribution chain *129*
3.4.5 Mineral oil chain: petrol stations *129*
3.4.6 Mineral oil chain: storage and transfer companies *130*
3.4.7 Chemical industry *130*
3.4.8 Industrial use of glue *132*
3.4.9 Printing industry: general *133*
3.4.10 Printing industry: publication rotogravure *134*
3.4.11 Printing industry: packaging printing firms *135*
3.4.12 Printing industry: heatset web offset *136*
3.4.13 Processing of plasticised PVC *137*
3.4.14 Polyester resin processing *137*
3.4.15 Production of polystyrene foam *138*
3.4.16 Processing of soy beans and adipose seeds *139*
3.4.17 Textile industry *139*
3.4.18 Flower dyeing businesses *139*
3.4.19 Cleaning and degreasing in the metal and electrotechnical industry *140*
3.4.20 Use of paint: metal products *141*
3.4.21 Use of paint: steel preservation *143*
3.4.22 Use of paint: car respraying shops *144*
3.4.23 Use of paint: carpentry industry *145*
3.4.24 Use of paint: wooden furniture industry *146*
3.4.25 Cleaning of tank lorries *147*

3.5 BAT reference documents *151*
3.5.1 Chlorine-alkaline producing industry *152*
3.5.2 Manufacture of iron and steel *156*
3.5.3 Pulp and paper industry *164*
3.5.4 Cement and lime manufacturing industry *175*
3.5.5 Ferrous metal industry *179*
3.5.6 Glass-producing industry *190*
3.5.7 Non-ferrous metal industry *208*

3.6 Odour *223*
3.6.1 Systematic determination of acceptable nuisance levels *223*
3.6.2 Categories of research methods into odours *227*
3.6.3 Description of research methods into odours *228*

3.7 Monitoring emissions *233*
3.7.1. Introduction *233*
3.7.2 NeR monitoring regime and associated types of monitoring *233*
3.7.3 Verification through ERPs *237*
3.7.4 Verification by measurement *239*
3.7.5 Assessment of the results of the measurements in reference to the emission requirement *241*

3.8 Remaining special regulations *243*
3.8.1 Emission of particulates during the processing, preparation, transport, loading and unloading as well as during storage of materials susceptible to dispersion *243*

3.9 Horizontal BAT reference documents (BREFs) *247*
3.9.1 Treatment of waste water and flue gasses *247*

4 Annex *257*
4.1 List of references *259*
4.2 Terms and definitions *261*
4.3 Overview of MTR levels and target levels for air quality *265*
4.4 Minister's letter of June 1995 concerning odour *267*
4.5 Overview of classification of substances *275*
4.6 Classification of drift sensitive materials *283*
4.7 Standardised measuring methods *287*
4.8 List of carcinogenic and suspected carcinogenic compounds *291*
4.9 Overview of General Administrative Orders for installations or activities *303*
4.10 Overview of available KWS2000 fact sheets *307*
4.11 KWS2000 source categories *309*
4.12 KWS2000 industry-wide agreements *311*
4.13 Description of the cost effectiveness methodology *313*
4.14 Overview of general emission standards *321*
4.15 Compulsory minimisation procedure *323*
4.16 Procedure for classification into SOMS concern categories *327*
4.17 Categories of the IPPC Directive *331*
